

EA0012

10W Horn Speaker

Installation Instructions

Description

The EA0012 ABS horn speakers are designed primarily for distributed paging systems where a high degree of speech articulation and program clarity is paramount. Typical applications include schools, train and bus stations, airports, car parks and plant rooms.

A screwdriver adjustable power tap switch is provided for each model as is a 22µf bipolar isolation capacitor to permit line monitoring function when employed with emergency PA and fire evacuation installations. A 4 core loop through flying lead is provided.
